Welcome to Country  
Kerry Neill

# Kerry Neill Gubbi Gubbi/Kabi Kabi man

Sunshine Coast region in South East Queensland

Kerry Neill is a Gubbi Gubbi/Kabi Kabi man from the Sunshine Coast region in South East QLD. Kerry has been working with Aboriginal and Torres Strait Islander peoples in community services and education for over 15 years. He is the director of Goombuckar Pty Ltd and runs two successful businesses, Goombuckar Creations and TribalLink.

Kerry has facilitated anger management courses in correctional facilities and schools across NSW and has toured nationally and internationally as a dancer and yidaki (didgeridoo) player.

Kerry has developed and delivered cross cultural communication, dance and behaviour management programs across NSW and QLD. His company delivers Aboriginal education to over 30,000 children a year and provides cultural education and training for various industries including schools, universities, medical centres and hospitals.

He brings a wealth of knowledge through his upbringing and professional experience. He enjoys working with people to create a greater understanding of Gubbi Gubbi/Kabi Kabi culture and creates a fun-filled and memorable experience for all participants.

# TIS CEO Workshop

8 May 2019

# Tackling Indigenous Smoking Program

## Final Evaluation Report

Prepared for the Australian Government Department of Health  
July 2018

## Evaluation

### Recommendations

#### *Community engagement and partnerships*

1. **Regional grant recipients:** Continue involving community members in the design, delivery and evaluation of local TIS programs and sustain use of partnerships to broaden reach, strengthen referral pathways, and support other program objectives including preventing uptake, promoting expansion of smoke free spaces, and changing social norms.

#### *Localised health promotion*

2. **Regional grant recipients:** Continue delivering targeted, multi-level, tobacco-focused health promotion.
3. **NBPU TIS:** Provide additional training and information on best practice, multi-level, tobacco-focused health promotion for targeted groups including pregnant women.

#### *Overarching TIS program*

17. **Department:** Continue the delivery of the TIS program.
18. **Department:** Commit to funding longer term (at least 4 years) and provide immediate advice about future funding to minimise funding uncertainty and associated staff turnover and underspend.

## Stability and impactful

#DEADLYREADY #READYTOBORN #SMOKEFREECOMMUNITY

**This is a  
Smoke Free Zone**  
STAY SMOKE FREE

## The revamped TIS program will:

- *Continue the successful Regional Tobacco Control grants scheme* including school and community education, smoke-free homes and workplaces and quit groups
- Expand programs *targeting pregnant women and remote area smokers*
- Enhance the Indigenous *quitline* service
- Support *local Indigenous leaders and cultural programs* to reduce smoking
- *Continue evaluation* to monitor the efficiency and effectiveness of individual programs, *including increased regional data collection "*

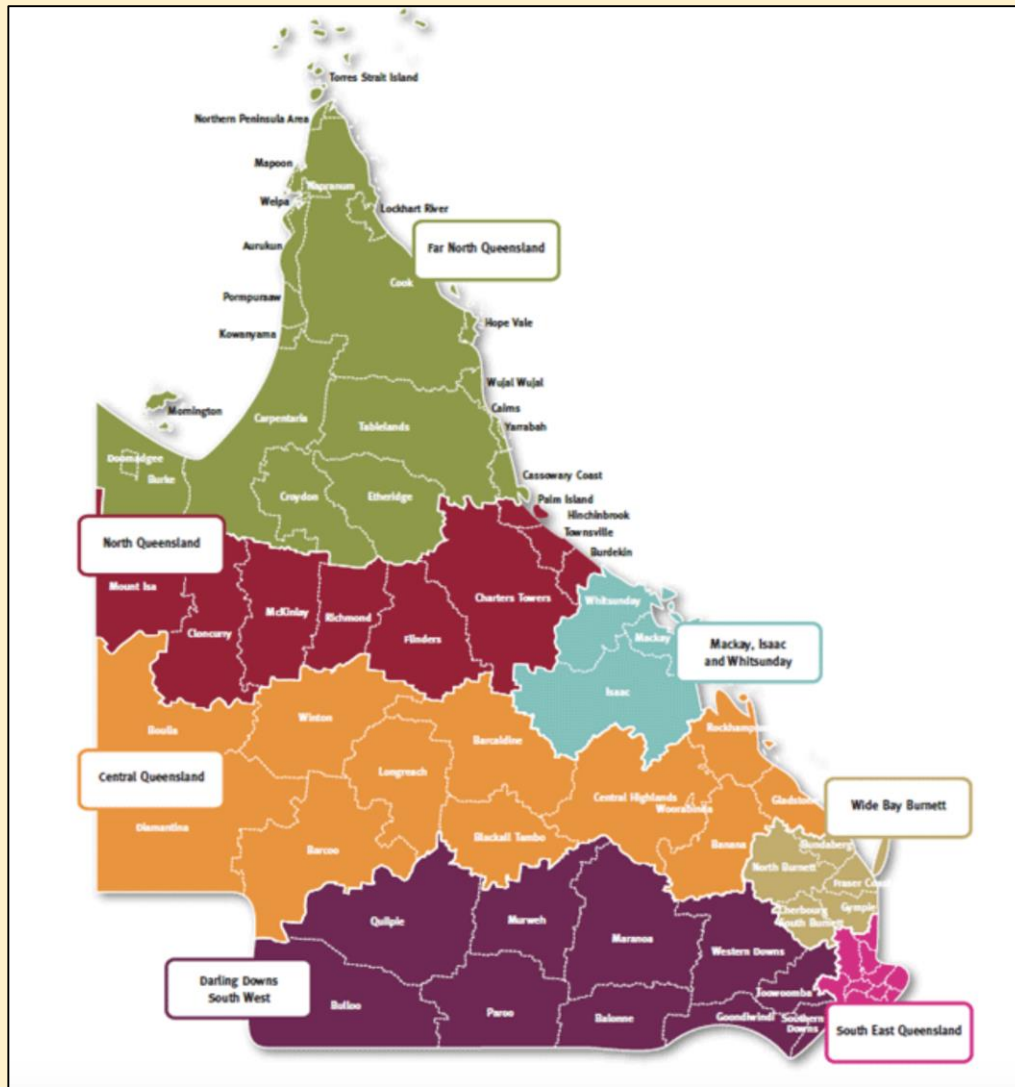

<https://www.health.gov.au/internet/ministers/publishing.nsf/Content/health-mediarel-yr2018-wyatt012.htm>

11 February 2018

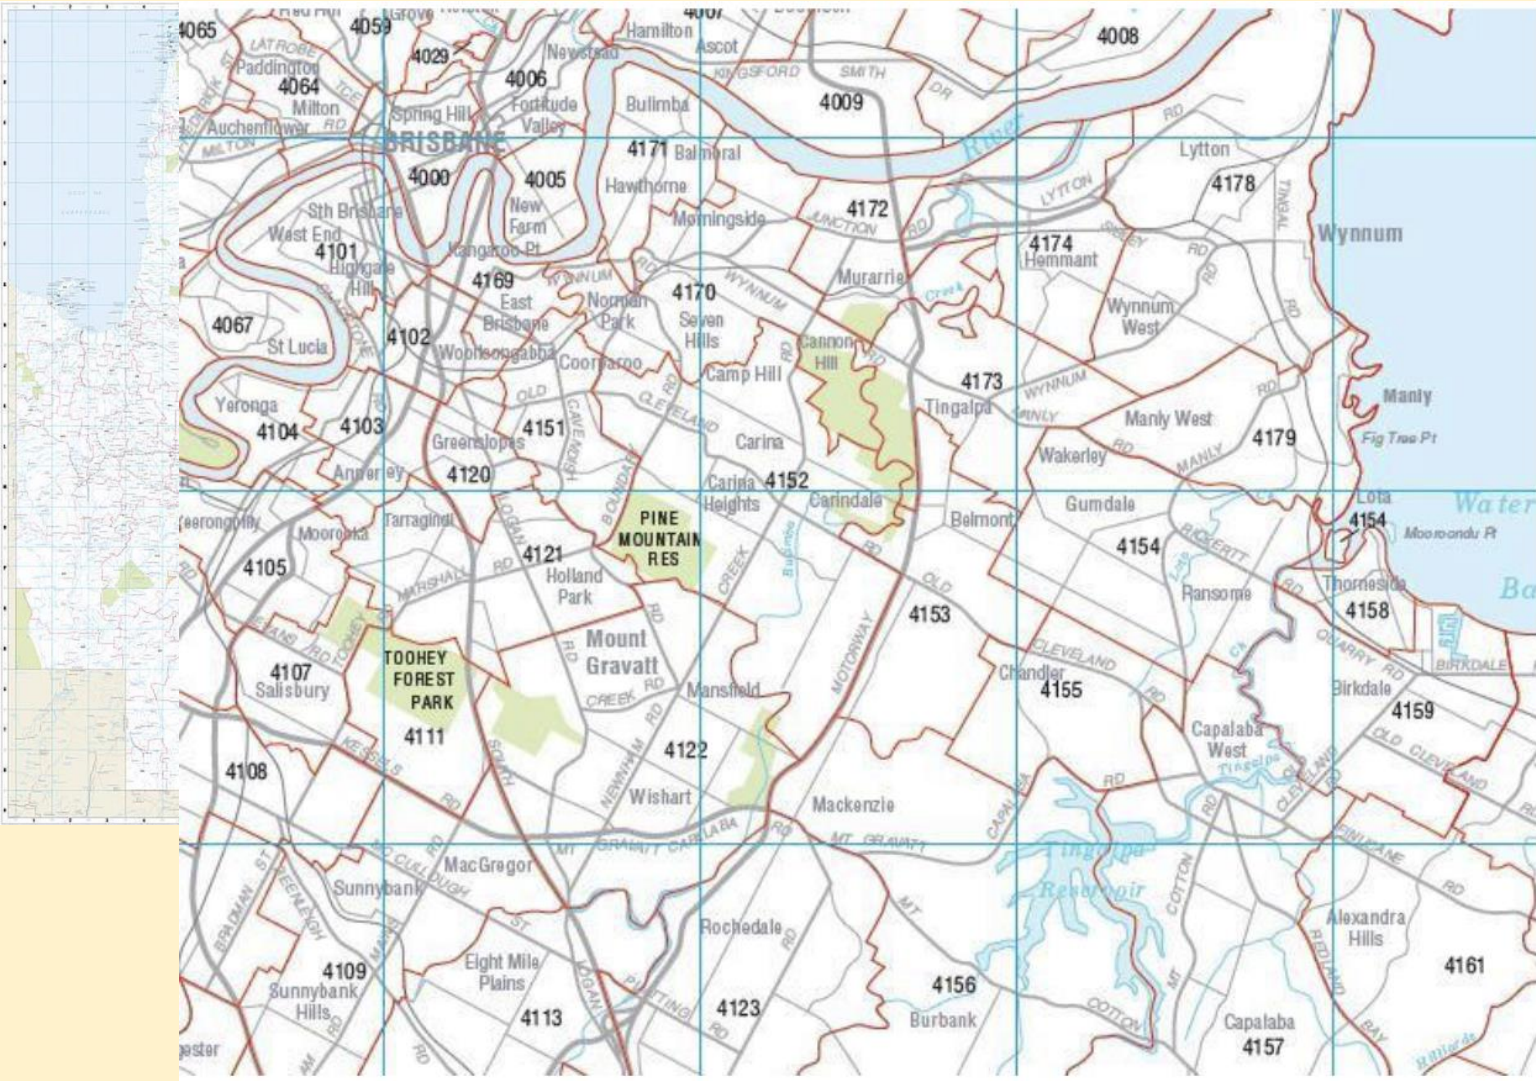

## Extract from letter that went to Grant Recipients

**For the TIS program going forward**, there will be specific requirements for TIS organisations, namely all **will be required to**:

- prioritise **evidence-based population health approaches** with **maximum reach within their identified TIS region**;
- ensure that Indigenous people **who do not attend** Aboriginal Community Controlled Health Services (ACCHS) or Aboriginal Medical Services (AMS') **are targeted and reached**; and
- **provide evidence of how** their **primary health care funding** (where provided by the Commonwealth) **is being used to complement TIS activities** as part of a larger mix of tobacco cessation interventions.

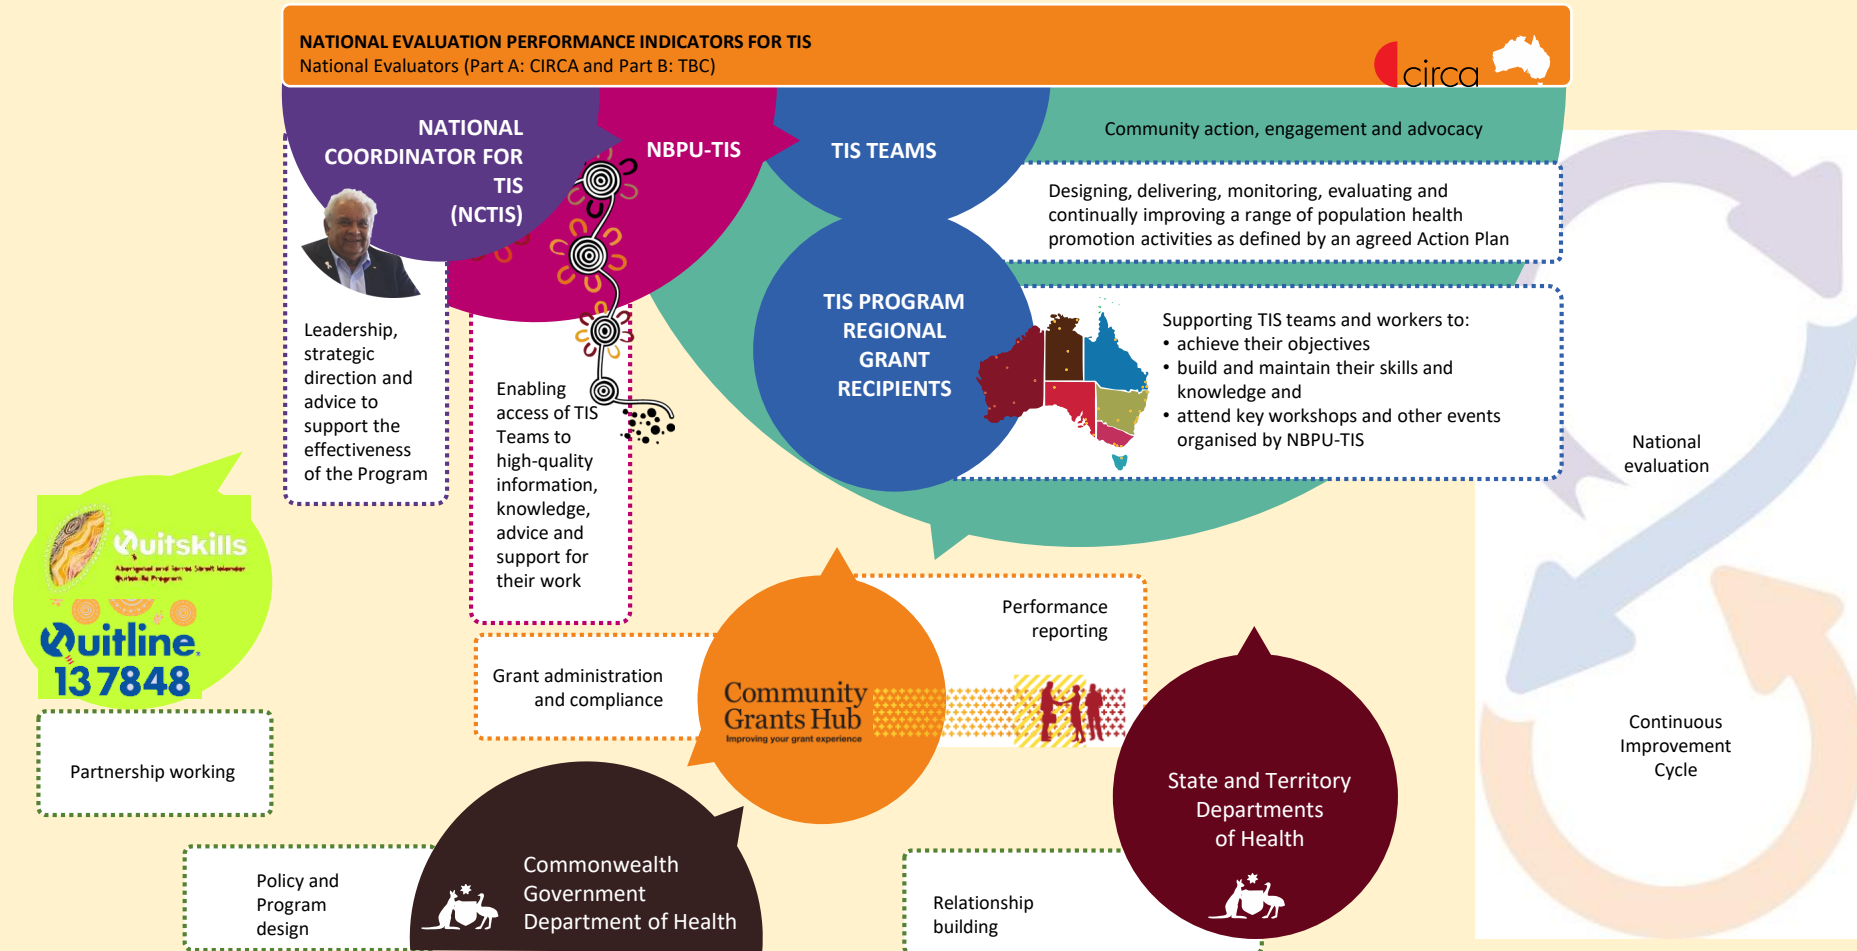

## Defining Service Boundaries

# Overview of TIS Program Responsibilities, Relationships and Processes

# Evaluating the impacts of TIS regional grants on smoking outcomes

The National Study of Aboriginal  
& Torres Strait Islander Wellbeing

**Ray Lovett & Katie Thurber**  
Aboriginal and Torres Strait Islander Health Program  
Research School of Population Health, Australian National University

A photograph of three Indigenous women. The woman on the left has long grey hair and is wearing a pink shirt, looking towards the center. The woman in the middle has dark curly hair, is wearing a green shirt, and is smiling broadly. The woman on the right has dark curly hair and is wearing an orange and purple patterned shirt, also smiling. They appear to be in a group setting, possibly a community meeting or a social gathering.

# **Tackling Indigenous Smoking Program Evaluation**

## Issues raised by TIS Workers to discuss at the CEO Workshop

- **Increased TIS awareness**

- CEOs and Managers need to be more awareness about the **TIS Teams roles, requirements**
- CEO understanding of **TIS expectations around branding/ co-branding/ stand-alone branding and using TIS resources within the AMS**

- **Improved communication**

- **Timely communication** please – often people on the ground experience **delays in receiving communication/** updates due to delays through many levels within the organisations. E.g.: reporting templates, approvals etc.
- **Communicate information from CEO's meeting** to TIS teams re: what was said etc. or NBPU to add in their newsletter
- Ensuring continuity of staff by **clear roles, funding** requirements / limitations

## CEOs / Grant Recipients to consider

- **Delivery Limitations**

- Restricted **weekend work** impacts on service provided
- Restrictions on **leaving office** – aren't allowed **to attend events**
- Capacity to **hold weekend events**
- Insists the TIS Team to continue **one-on-one delivery sessions** instead of population health

- **Scope of delivery**

- **Re-classification of remote** to recognise extremely remote locations
- **Define region** of delivery
- Title **TIS Educators** or **Officers**
- Attend other **outlying communities** within shire **regardless of ACCHO borders**

## Issues for CEOs

- **Funding/Budgets**

- More **access**/ knowledge of TIS Budget
- TIS Team more **ownership** and control over budget not the AMS Business Manager
- Funding being **used for other programs** ie people be paid salary from TIS \$\$s when they aren't in the TIS Team
- **Advise budget to TIS workers** on the ground. This will help TIS Workers to plan events

- **Resources**

- **Better phone** – software
- Humbugging for TIS Resources
- Internal / **Social media access** / access to social marketing tools. E.g.: Facebook
- ***Re-classification of remote*** to recognise extremely remote locations

## Issues for CEOs / NBPU / DoH

- **Partnerships/collaboration**

- State/ Territory-based:
  - collaboration
  - partnerships
- TIS Collaboration - resources/ working together (like WA)
- Integration of TIS throughout all services – ie sexual health, Mums and Bubs etc
- Co-ordinated approach – State level i.e. state carnival, share finance
- Can we have more partnerships with other TIS teams in our State?
- Work across regions with similar challenges

## Issues for CEO, DoH and NCTIS

### • Other

- More support for TIS Teams and **modelling the message** – walk the talk, **enforce policies** ie how can we **stop smoking in our own organisation** – in uniform, clock off for breaks etc.
- Increase Aboriginal and Torres Strait Islander **employment**
- **Population Health** approaches
- **More opportunity to attend conferences** for broader learning and widening perspectives and networking
- Drive **strategic strategy planning** - so momentum is developed and maintained
- **Evaluation framework** asap in consultation with grant recipients
- Lobbying CIRCA/ NBPU/ DoH for **feedback on TIS Programme performance/ reporting/ national directives**
- Lack of report **feedback**
- **Clarity** on / position of scope of delivery

## Policy Advice – TIS Workers in **prisons** and **detention centres**

### Formal Advice

- “...it is Constitutionally permissible **for TIS** to be delivered in prisons – **but IAHP\* guidelines states that only to Indigenous prisoners**”.
  - “TIS policy is currently that **it is permissible if we know that the states/territories aren't doing anything** in this space, and the TIS team *can demonstrate that this is a priority population group for them ...*”
  - **DSS Hub Managers have been advised** of this policy advice re Commonwealth funded workers being able to deliver TIS in prisons
- \* Indigenous Australians' Health Programme**

## **Policy Advice – TIS Workers in prisons and detention centres**

### **Response for TIS activities**

- Activity in prisons must still be POPULATION HEALTH focussed with referral to Quitline etc
- All current rules for TIS funding still apply
- Encourage other agencies to join the prison visits ie state and territory govts, ACCHOs, Cancer Councils and Quitline etc
- Establish clear referral procedures with the prison health staff
- Utilise NBPU videos where permitted
- Ensure that prison visits do not distract from other TIS outreach community activities

## Collecting data and monitoring and evaluating activity

### Present

- If not already in Activity Plans ensure prison activity is in the next plan
- Report on activity ie numbers, referrals etc
- Endeavour to identify smoking behaviour post release
- Department will advise state and territory government stakeholders through National Expert Reference Group on Tobacco (NERGOT) and Tobacco Policy Officers Group (TPOG)

### Future

- The Department will work with CIRCA to:
  - Identify how TIS prison activity is evaluated, and
  - Identifying the outcomes of referrals

 > About the Tackling Indigenous Smoking Resource and Information Centre

## About the Tackling Indigenous Smoking Resource and Information Centre

The Tackling Indigenous Smoking Resource and Information Centre (TISRIC) has been developed by the National Best Practice Unit for Tackling Indigenous Smoking (NBPU TIS) of best practice by organisations funded under the Australian Government **Tackling Indigenous Smoking (TIS) program**.

From 2015 the emphasis for organisations delivering TIS activities (regional grant holders) is to:

- make sure their activities are based on evidence of effectiveness (there is information that the activity has worked well to reduce smoking in s
- measure the impact which they are having on smoking in their region (monitoring and evaluation).

The TISRIC supports TIS-funded organisations by bringing together information and evidence on what works for tackling smoking in Aboriginal and providing a space where funded organisations can share their knowledge of what is working in their local community.

Information on the TISRIC is provided to help TIS-funded organisations choose:

- evidence based activities
- resources to support those activities
- information/tools for evaluating and monitoring TIS activities.

The TISRIC is managed and run by NBPU TIS, who will keep it updated with information and tools to help TIS-funded organisations to plan, monitor

TIS-funded organisations are encouraged to share information about what is working to reduce tobacco use in their local area. If you have informati making a difference to reduce smoking, please **contact NBPU TIS**.

# Research to support Collective Impact for Stronger Communities for Children in the NT

## How ACRs can help TIS teams

Example: Family Day organised for World No Tobacco Day in Halls Creek, two Fridays ago, 31st May.

The local TIS team of two men from Yura Yungi Aboriginal Medical Service coordinated the event at the main park in town.

Let's say that 200 people came along, ate lunch, heard some speeches by local polities and sports players, visited stalls on health promotion, talked to TIS workers, used the smokerlyzer, saw videos on 'Don't Make Smokes Your Story' and listened to a local band.

## How ACRs can help TIS teams

Every research project needs one or more high-level research questions. In this case, there could be a single question:

*How effective was the Family Day in helping to tackle Indigenous smoking in Halls Creek?*

If there were 200 people coming and going during the event, the TIS workers are going to struggle to do the necessary research on their own.

This is where the ACRs come in.

**DON'T  
MAKE  
SMOKES  
YOUR  
STORY**

**"I QUIT FOR MY FAMILY"**  
- TED

[australia.gov.au/quitnow](http://australia.gov.au/quitnow)

A model of working, which identifies how a  
**population health approach**  
can be implemented through action on the full range  
of

**health determinants**  
by means of  
**health promotion strategies**

# Population Health

- Improve the health outcomes and wellbeing of an entire population\*
- Reduce health inequalities

Focus:

\*Population = people within and across a defined locality, region, or nation

## Health promotion strategies:

- Enable people to take control over their health/wellbeing;
- Health is a positive concept and includes social and personal resources;
- Requires community participation, partnership working and attention to the determinants of health

[This Photo](#) by Unknown Author is licensed under [CC BY-NC-ND](#)

Why TIS takes a  
Population Health  
Approach:

- Recommended by WHO;
- Actions needed at all levels to be effective
- Important health gains come from focusing programs on the health of an entire population;
- Small gains for the many v. large gains for the few;
- Repetition to increase small effect over time.

*Community based action to improve and maintain population health and reduce inequalities in health*

2. Tuning in to M&E
3. How our Action Plan helps us

# Think of a moment when...

...you knew your TIS work  
was making a difference

Please write that moment on a coloured card.

This is anonymous and we are going to stick  
them on the wall and see what people say

**‘Go and see the lady with the chickens’**

‘The story of Mrs. Kumar makes us realise  
how our program makes a difference’

NATIONAL BEST  
PRACTICE UNIT  
**TACKLING  
INDIGENOUS  
SMOKING**

# Case Studies

Examine stories, e.g.

- Individuals who have quit
- Homes becoming smoke-free
- Workplaces staying smoke-free
- Partnerships and networks

Ethel-Anne Gundy talks about quitting

Marlene talks about quitting

Ray talks about quitting

# Tuning in to M&E

What is monitoring and evaluation?

**Monitoring** = Regular collection of information on progress you are making

**Evaluation** = Taking a step back to look at the bigger picture of the difference TIS work is making in the community

**Monitoring** = Regular collection of information on progress you are making

**Evaluation** = Taking a step back to look at the bigger picture of the difference TIS work is making in the community

Monitoring and evaluation is research

Most people working in services do it.

For example, think of hotel questionnaires, 'please stay on the line' surveys, etc.

# Why do M&E?

1. To know what works best
2. To improve the way we do things
3. To produce information for reports

# What works best for us in different parts of Queensland?

How do we know?

# Steps for M&E for TIS

Consider  
National  
Indicators

Develop  
Action Plan

Work out local  
measures

What do we want  
to measure?

Decide on  
methods

How do we want  
to measure it?

Collect data

Then analyse  
and present it

# National Indicators

1. Implementation of evidence based population health promotion activities aimed at preventing uptake of smoking and supporting the promotion of cessation
2. Partnerships and collaborations support tobacco control
3. Increased access to Quit support through capacity building
4. Reduced exposure to second hand smoke
5. Increased focus on priority groups, e.g. pregnant women
6. Increased reach into communities

For each indicator,  
a simple approach is to measure:

What we have done in  
**numerical** terms:

- No. of people reached
- No. of events
- No. of visits to communities
- No. of activities

What **difference** it has  
made in the community:

- Knowledge people have
- Their participation
- Actions they are taking as a result (pledges, smoke-free homes, etc.)

# How our Action Plan helps us

To be able to monitor and evaluate, we need to know exactly what we are trying to achieve.

This is where the Action Plan comes in...

# Every TIS team produces an Action Plan

## Activity Work Plan for Transition grant period 1 January 2019 – 30 June 2019

This action plan provides an overview of the key aims, activities and performance measures for the TIS program.

<b>Aims</b> <i>What are you trying to achieve?</i>	<b>Strategies</b> <i>How will you do this?</i>	<b>Performance Indicators</b> <i>How will you measure performance?</i>	<b>Targets</b> <i>What are your targets?</i>	<b>Timeframe</b> <i>When will this be delivered?</i>
More smoke-free homes in the community	Outreach work to help people to make pledges and then to support them to maintain their home smoke-free	<ul style="list-style-type: none"><li>• No. of pledges</li><li>• Interviews with 20% of heads of families</li></ul>	25 homes in the community declared and remaining smoke-free	By end of June 2019

This activity contributes to National Indicator Nos. 1, 4 and 6.

# National Indicators

1. Implementation of evidence based population health promotion activities aimed at preventing uptake of smoking and supporting the promotion of cessation
2. Partnerships and collaborations support tobacco control
3. Increased access to Quit support through capacity building
4. Reduced exposure to second hand smoke
5. Increased focus on priority groups, e.g. pregnant women
6. Increased reach into communities
