

National Reach and Priority Projects

Mel Donohue, Project Manager, NRPP
(Adnyamathanha)

TACKLING INDIGENOUS SMOKING

NRPP Background

- Since 2022, approximately $11m of TIS funds have been available for innovative National Reach and Priority Projects
- The national reach and priorities are:
  - greater reach into regional, remote and very remote areas that have high smoking rates
  - pregnant women, their families and women of childbearing age;
  - and, youth
- Funds were sourced from core funding, as well as underspends by TIS grant recipients
- Intention is to complement TIS grants rather than duplicate. These are contracts as opposed to grants.
- Three rounds of procurement were completed by Ninti, adhering to Commonwealth Procurement Rules

Project Summary

- Over 50 bids were received
- 15 projects were funded in total
- 11 different suppliers
- Out of those, 3 are current TIS grant recipients
- 3 projects from R1 have been completed
- Ninti One Limited has engaged CIRCA to complete an independent evaluation the NRPPs

The Consequences of Smoking

NATIONAL WOMENS KITS
We're thrilled to announce our new TIS program specifically designed for women during pregnancy. This smoking and vaping cessation support kit has been created, designed, and curated by mob to help support our community. These Women's Kits are currently in production and set for release to registered health organisations by June 2025.

Project Information

Evidence of NRPP Success

- Preliminary findings show that NRPP projects are culturally safe
- Collaboration with local TIS teams was highly valued
- Projects are seeing additional health benefits outside of smoking and vaping education

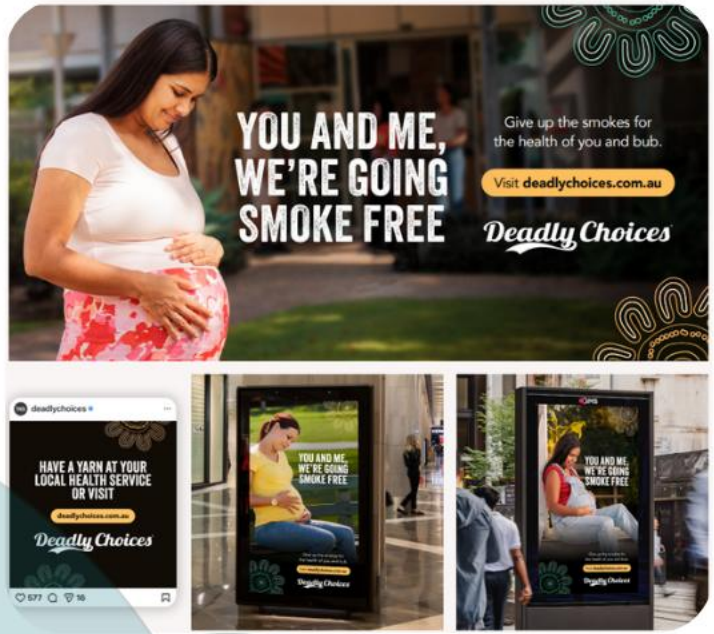

Learnings

- Workforce has been a challange for NRPPs
- SA, Tas and WA do not have NRPPs
- Traits of successful bids

Closing

- All projects will be completed by June 2027
- Each project will conclude with a final evaluation report completed by the supplier
- We look forward to seeing the full picture of the NRPP outcomes at that time
